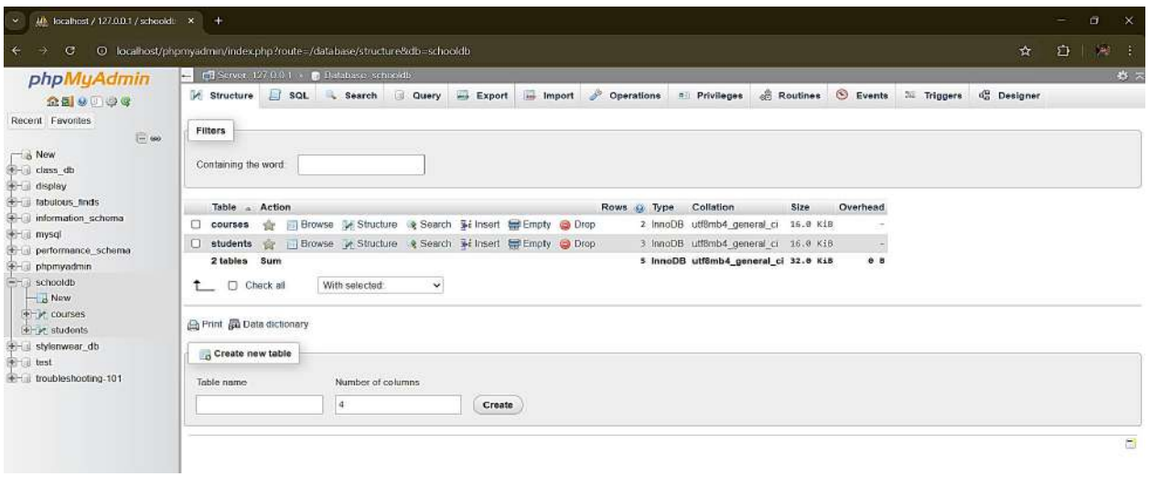
BAGONG PILIPINAS

**Name:** Dan Francis S. Etorma **Subject:** Information Management

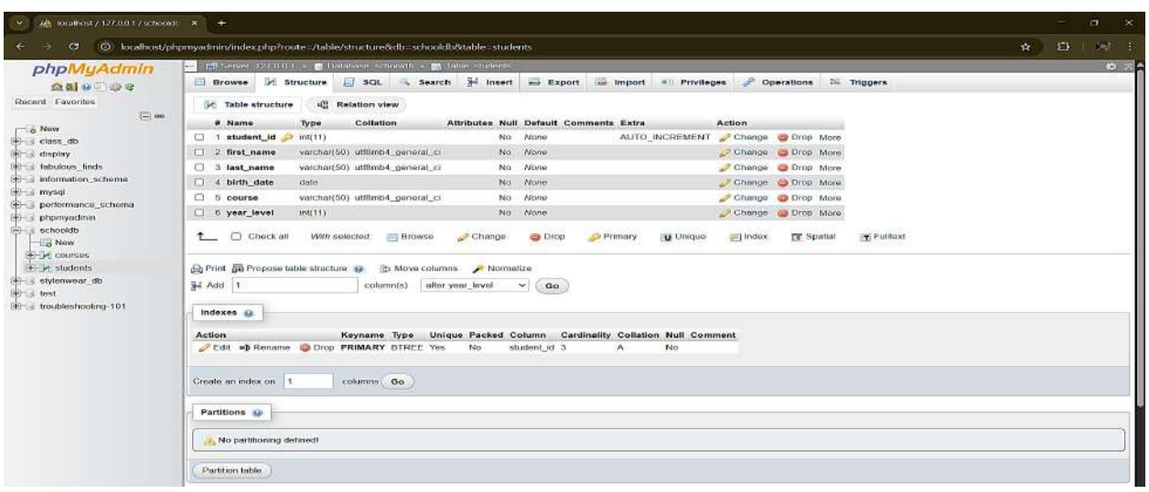
**Course Year & Section:** BSIS 2-A **Professor:** Mr. Guillermo V. Red Jr.

**Screenshot of your Schooldb database in phpMyAdmin:**

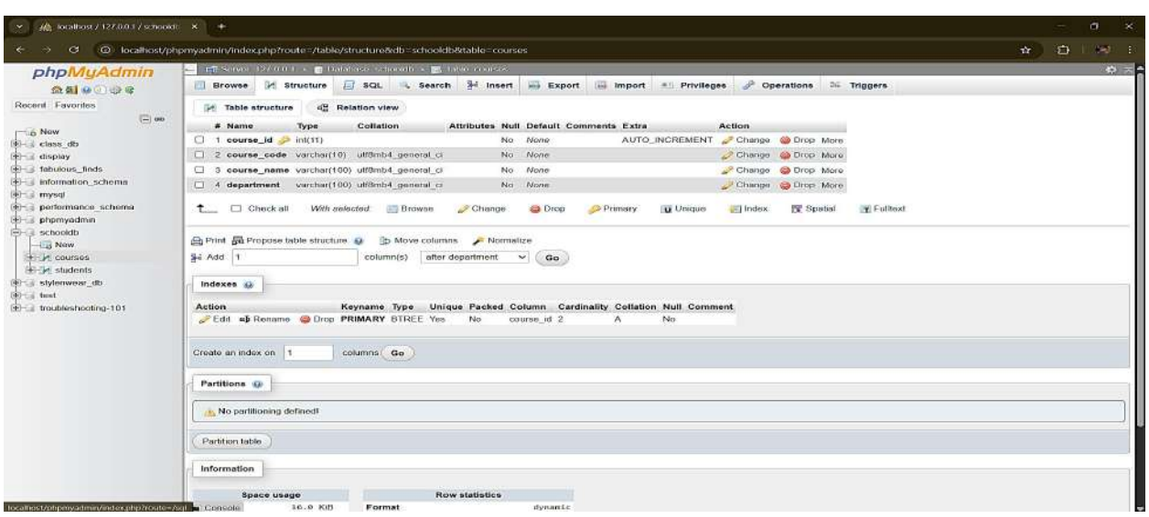


**Screenshot of the STUDENTS and COURSES table structure:**

**Students**

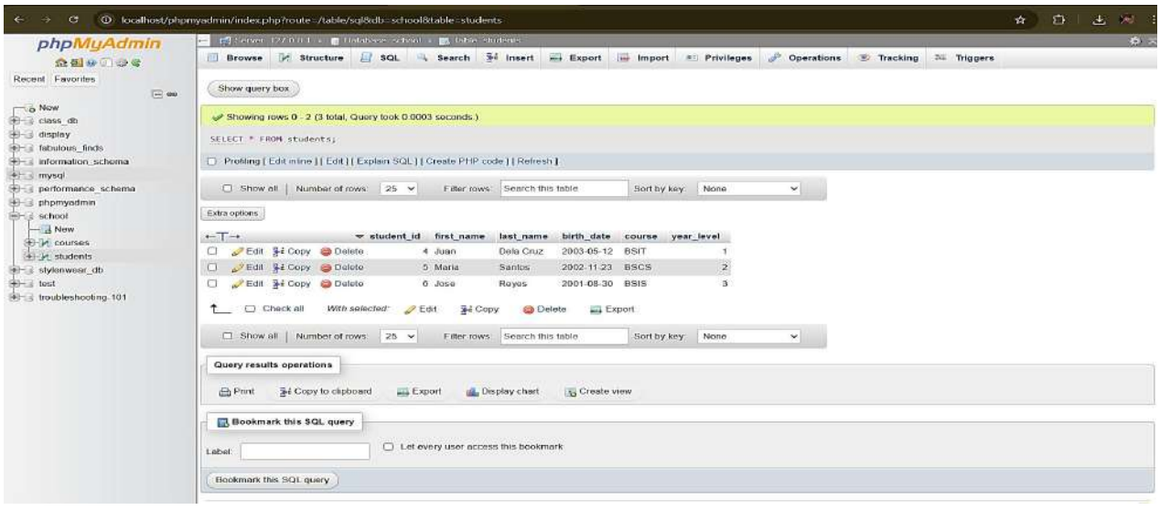


**Courses**

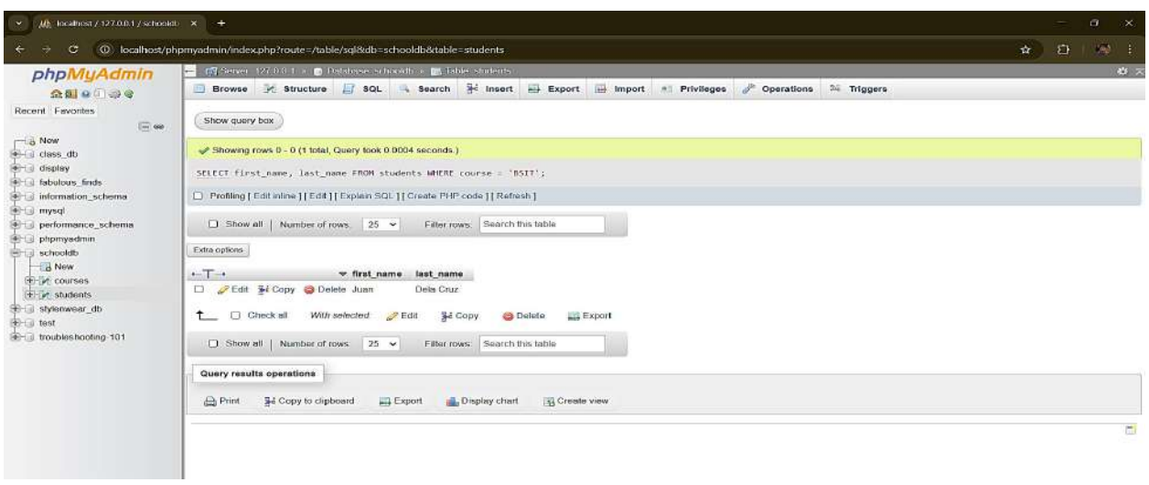


**Output for the 3 queries in part 5:**

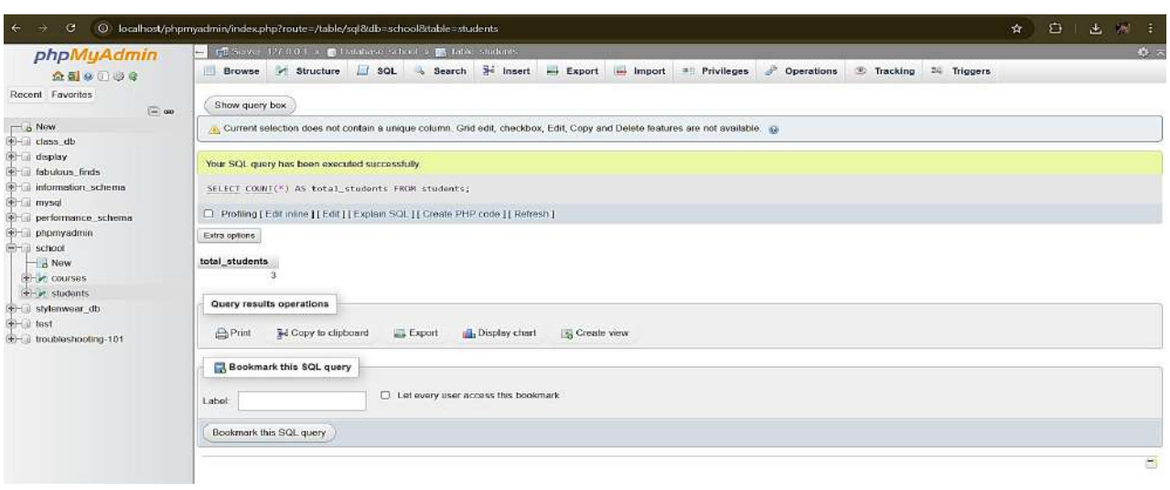
**SELECT * FROM STUDENT;**



**SELECT first_name, last_name FROM students WHERE course = 'BSIT';**



**SELECT COUNT(*) AS total_students FROM students;**



**Reflection: How does phpMyAdmin help you visualize and manage databases compared to command-line SQL?** It commands into a visual playground, letting you click, browse, and manage your database like editing a spreadsheet, instead of typing commands in a dark terminal.
